

In *Hospital Visit Adventure*, you begin your journey at the front doors of a busy hospital.

Once you begin the game, you find yourself in a sterile corridor with a friendly nurse standing nearby. She greets you and explains that before visiting your loved one, you'll need to review a series of important instructions displayed on the windows along the hallway. These instructions provide vital information about hospital protocols, safety measures, and ways to support your loved one during your visit.

Your task is to carefully read each instructional window as you walk down the corridor.

Once you've absorbed all the information, another nurse will provide you with additional instructions about the quiz to ensure you're prepared.

Successfully passing the quiz unlocks access to your loved one's room, allowing you to offer support and comfort.

This game combines exploration, learning, and a touch of challenge, making your hospital visit both meaningful and engaging.
